

Figure 3a · A useful action graph with a role error

Published narrative · Lewis Carroll, Alice’s Adventures in Wonderland, Chapter I · B output

SOURCE · complete evidence shown

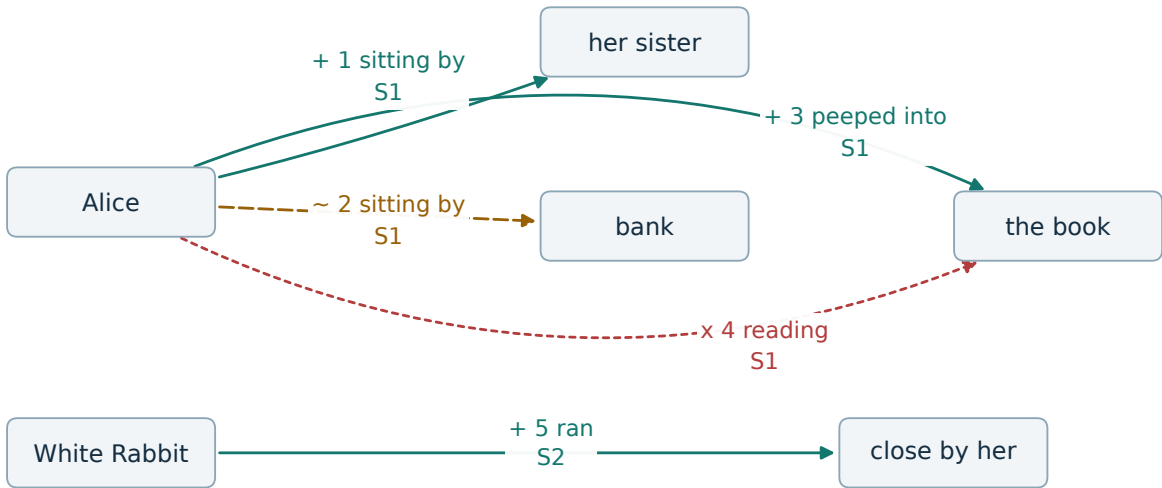

- S1 Alice was beginning to get very tired of sitting by her sister on the bank, and of having nothing to do: once or twice she had peeped into the book her sister was reading, but it had no pictures or conversations in it, “and what is the use of a book,” thought Alice “without pictures or conversations?”
- S2 So she was considering in her own mind (as well as she could, for the hot day made her feel very sleepy and stupid), whether the pleasure of making a daisy-chain would be worth the trouble of getting up and picking the daisies, when suddenly a White Rabbit with pink eyes ran close by her.

REQUEST 1 · actions

Which sitting/location, reading/inspection and running relationships involve Alice, her sister, the book, bank and Rabbit? Exclude thoughts, feelings, appearance and book-content properties.

Text + action question → direct contextual extraction

Strict qualified F1 0.400 · 5 predictions

Genuine error and lost specificity

The text assigns reading to Alice's sister; B instead says Alice was reading. 'Sitting by bank' is less specific than 'on the bank'. The Rabbit's 'close by her' wording is retained, not silently converted into an Alice node.

+ supported ~ partial x unsupported ? unresolved I irrelevant
